

KITTEN WELLNESS

Congratulation on your new kitten! Below is an outline of our recommendations.

8 weeks of age

- Weight
- Wellness exam
- Kitten Distemper vaccination (Rhinotracheitis and Calicivirus included)
- Stool sample check +/- deworming
- Free Kitten Pack (Important information and handouts to discuss. Plus first free dose of flea/tick prevention)

12 weeks of age

- Weight
- Wellness exam
- Nutrition discussion
- Distemper booster
- Feline Leukemia vaccination # 1 – This vaccine is recommended for outdoor cats.
- FeLV/FIV Combo Test – at this age we are primarily interested in whether the kitten was infected by its mother.

16 weeks of age

- Weight
- Wellness exam
- Final Distemper in the kitten series, now annual boosters
- Final Leukemia booster, now annual boosters
- Rabies 1 year vaccination (next year a 3 year vaccine will be given if given on time)
- Booking your pet's spay or neuter appointment which is recommended at 6 months of age.
- Home Again Microchipping (A good time for that is when getting spayed / neutered)
- Heartworm and flea / tick prevention

Annual Visits

- Weight
- Wellness exam
- Stool sample check
- Discuss dental health care
- Nutritional recommendations
- Vaccinations: Our life stage vaccination programs tailors the vaccines your pet receives based on risk factors, which we will discuss with you. Your cat's vaccines can include: Distemper and Leukemia. Rabies is given every three years.
