

PUPPY WELLNESS

Congratulation on your new puppy! Below is an outline of our recommendations.

8 weeks of age

- Weight
- Wellness exam
- Distemper vaccination (hepatitis, parainfluenza and parvovirus included)
- Stool sample check and deworming
- Free puppy pack (Important information and handouts to discuss. Plus first free dose of heartworm and flea/tick prevention.)

12 weeks of age

- Weight
- Wellness exam
- Nutrition discussion
- Distemper booster
- Lyme vaccination # 1
- Heartworm and flea / tick prevention

16 weeks of age

- Weight
- Wellness exam
- Final Distemper and Lyme boosters. (Hereafter will be recommended annually)
- Rabies 1 year vaccination (next year a 3 year vaccine will be given if given on time)
- Booking your pet's spay or neuter appointment which is recommended at 6 months of age.
- Home Again Microchipping (A good time for that is when getting spayed / neutered)
- Heartworm and flea / tick prevention

Annual Visits

- Weight
- Wellness exam
- Stool sample check
- Heartworm/ lyme/ehrlichia/anaplasmosis blood test (we recommend testing annually)
- Discuss dental health care
- Nutritional recommendations
- Vaccinations: Our life stage vaccination programs tailors the vaccines your pet receives based on risk factors, which we will discuss with you. Yearly vaccines can include: Distemper, Lyme, Bordetella and Leptosporosis.
